In the claims:

Please amend the claims in the following manner.

1- 30. (Canceled)

31. (Currently Amended) A method comprising:

receiving [[a]] viewer characteristic information ~~file~~ at a programming guide server from a viewer's entertainment system, the viewer characteristic information ~~file~~ identifying a viewer and including viewer preferences and demographic information about the viewer; and

the programming guide server providing the viewer with access to the viewer characteristic information ~~file remotely from the programming guide server~~ at a different entertainment system.

32. (Currently Amended) The method of Claim 31, wherein the viewer characteristic information ~~file~~ includes information gathered from the viewer.

33. (Currently Amended) The method of Claim 31, wherein the viewer characteristic information ~~file~~ includes viewing habits of the viewer.

34. (Currently Amended) The method of Claim 31, wherein the viewer characteristic information ~~file~~ includes channel preferences of the viewer.

35. (Currently Amended) The method of Claim 31, wherein the viewer characteristic information ~~file~~ includes visited Internet web site types of the viewer.

36. (Currently Amended) The method of Claim 31, wherein the viewer characteristic information ~~file~~ includes information about the viewer's entertainment system from which the viewer characteristics information ~~file~~ was received.

37.   (Currently Amended) The method of Claim 31, wherein the viewer characteristic information file includes ratings provided by the viewer at the viewer's entertainment system of broadcasts.

38.   (Currently Amended) The method of Claim 37, wherein the ratings include feedback offered by the viewer to the broadcasts.

39.   (Previously Presented) The method of Claim 38, wherein the feedback comprises answers provided by the viewer to a questionnaire about the broadcast.

40.   (Previously Presented) The method of Claim 39, wherein the questionnaire comprises a synopsis of the broadcast.

41.   (Currently Amended) The method of Claim 31, further comprising updating the viewer characteristics information file using viewing habit changes.

42.   (Currently Amended) The method of Claim 31, further comprising receiving a form of identification of the viewer before providing access to the viewer characteristic information file at the different entertainment system.

43.   (Previously Presented) The method of Claim 31, further comprising providing a list of the viewer's favorite broadcasts to the different entertainment system.

44.   (Currently Amended) The method of Claim 43, further comprising ranking the list of broadcasts based on the viewer characteristic information file before providing the list.

45.   (Currently Amended) A machine-readable medium having stored thereon data representing sequences of instructions which, when executed by a machine, cause the machine to perform operations comprising:

receiving a viewer characteristic <u>information</u> ~~file~~ at a programming guide server from a viewer's entertainment system, the viewer characteristic <u>information</u> ~~file~~ identifying a viewer and including viewer preferences and demographic information about the viewer; and

providing access to the viewer characteristic <u>information</u> ~~file~~ <u>to the viewer</u> ~~remotely~~ from the programming guide server at a different entertainment system.

46.   (Currently Amended) The medium of claim 45, wherein the instructions cause the machine to perform further operations comprising updating the viewer ~~characteristics~~ <u>characteristic information</u> ~~file~~ using viewing habit changes.

47.   (Currently Amended) The medium of claim 45, wherein the instructions cause the machine to perform further operations comprising receiving a form of identification of the viewer before providing access to the viewer characteristic <u>information</u> ~~file~~ <u>at the different entertainment system</u>.

48.   (Currently Amended) The medium of claim 45, wherein the instructions cause the machine to perform further operations comprising providing a ranked list of the viewer's favorite broadcasts to the different entertainment system.[[.]]

49-64. (Cancelled)

65.   (New) An entertainment server system comprising:

a communications interface to receive viewer characteristic information from a first entertainment system, the viewer characteristic information identifying a viewer and including viewer preferences and demographic information about the viewer; and

a processor to receive a form of identification from the viewer at a second entertainment system and to provide through the communications interface access to the viewer characteristic information to the viewer using the second entertainment system.

66.   (New) The entertainment server of Claim 65, wherein the processor is further to provide through the communications interface a programming guide that includes ratings based on the viewer characteristic information to which access was provided at the first entertainment system.

67.   (New) The entertainment server of Claim 66, wherein the programming guide includes a ranked list of broadcasts based on the viewer characteristic information.

68.   (New) The entertainment server of Claim 65, wherein the viewer characteristic information is based in part on feedback provided in response to a request from the viewer to provide feedback.

69.   (New) The method of claim 31, wherein the viewer characteristic information is based in part on feedback provided in response to a request from the viewer to provide feedback.

70.   (New) The medium of claim 45, wherein the viewer characteristic information is based in part on feedback provided in response to a request from the viewer to provide feedback.
